

# CERTIFICATE OF COMPLIANCE

## Persistent Organic Pollutants (POPs)

Persistent Organic Pollutants (POPs) are chemical compounds that can be found in certain types of consumer products, such as apparel & textiles, upholstered furniture, and electronic components. POPs are restricted in the EU under the POPs Regulation.

RFE International, Inc. has reviewed the EU POP directive number (2019/1021); including amendments (EU) 2024/2555 and (EU) 2024/2570, and the list in Annex 1: Prohibited POPs and certify that all product series are POP Free and meet all specifications as established in the RFE International, Inc specifications.

We are committed to ensuring continuing compliance with hazardous substances initiatives such as RoHS, REACH and POPs. We will continue to monitor any changes to the related legislation.
