

PFAS Declaration of Compliance

This letter is to assure that the products provided by **RFE International, Inc.**, do not contain or are made using **PFAS** substances (Perfluoroalkyl and Polyfluoroalkyl Substances).

(**PFAS**) are a group of chemicals that have been used in a variety of products in materials such as adhesives, coatings, inks, and plastics because of their ability to repel water and oil and their great chemical and heat resistance. However, PFAS has been linked to a range of health concerns, can persist in the environment for long periods of time, and accumulate easily in biological tissue.

The following regulatory lists are available for consultation to understand relevant CAS numbers that are defined as PFAS:

- EPA (Environmental Protection Agency) PFAS Master List:
